

# Demolish the Competition

**Safer**.....0 accidents, 0 injuries

**Faster**.....91% Schedule Savings

**Cheaper**.....95% Cost Savings

**Better**.....By Design

For over 30 years, Brokk machines have been saving time, money and injuries in nearly every kind of remote operation application. With compact size, remote control and easy maneuverability, a Brokk allows you to bring heavy-duty power into nuclear and other hazardous areas while keeping workers at a safe distance. And safer doesn't mean slower. Brokks are easy to use and come with a variety of hard-hitting, quick-hitch tools and

attachments to bring the job in ahead of schedule and below estimate. Add to that our technical and special application support, and you've got unmatched capability for both in-cell automated-sequence operations and facility demolition. Get more breaking information by calling 1-505-466-3614.
